RE: Sustainability Statement

Nystrom certifies and provides the following information for use in achieving LEED v4.1 credit for the specification of our Elastomeric & Vinyl Expansion Joint Systems:

Product: Elastomeric & Vinyl Expansion Joint Systems

Models: EWN, EWNw

Manufacturing Information:

- Final Assembly Location: Minneapolis, MN
- Extraction point is not within 500 miles of manufacturing

LEED Credit Contributions

Category: Materials and Resources (MR)

Credit: Sourcing of Raw Materials (1-2 Points)

Recycled Content: Nystrom Elastomeric Expansion Joint Systems are constructed of 30-51% Aluminum Alloy, which suppliers estimate consists of 75% Recycled Content (50% Pre-Consumer Content; 25% Post-Consumer Content).

Category: Materials and Resources (MR)

Credit: Material Ingredients

Material Ingredient Reporting (1 Point): A published, complete Health Product Declaration (HPD) is available for [Nystrom Elastomeric & Vinyl Expansion Joint Systems](#), with full disclosure of known hazards of all substances present at or above 0.1% (1,000 ppm), in compliance with the Health Product Declaration Open Standard. Nystrom Elastomeric & Vinyl Expansion Joint Systems can therefore contribute one whole product to the 20 different permanently installed products required for this credit.

Category: Indoor Environmental Quality (EQ)

Credit: Low-Emitting Materials (Up to 3 Points)

Nystrom Elastomeric & Vinyl Expansion Joint Systems are constructed of 31-52% plated or anodized metals, which LEED considers inherently non-emitting sources of VOCs.
