

Certified Contractor Program

Expansion Joint Systems

**Train.
Certify.
Install.**

The Nystrom Certified Contractor Program equips contractor companies and their installers with practical, hands-on training to properly prepare, install and inspect expansion joint systems—helping crews reduce callbacks, protect warranties and complete installs correctly the first time.

Install with Confidence

Proper training ensures correct installation the first time.

Reduce Risk

Certified companies minimize callbacks and warranty claims.

Speed & Quality

Standardized methods help crews work faster while maintaining consistent quality.

Professional Credibility

Certification differentiates your firm and reinforces trust with owners, architects and GCs.
