RE: Sustainability Statement

Nystrom certifies and provides the following information for use in achieving LEED v4.1 credit for the specification of our Retrofit Roof Hatch in Steel.

Products: Steel Retrofit Roof Hatch
Model: RHRG

Manufacturing Information:

- Final Assembly Location: Minneapolis, MN
- Extraction point is not within 500 miles of manufacturing

LEED Credit Contributions

Category: Materials and Resources (MR)

Credit: Sourcing of Raw Materials (1-2 Points)

Recycled Content: Nystrom Steel Retrofit Roof Hatch is composed of at least 92% Steel Alloy, for which LEED® allows a default value of 25% post-consumer recycled content. Steel used by Nystrom may have higher recycled content, and may also include pre-consumer content. However, we have chosen to report this default value due to the variability of recycled content over time.

Category: Materials and Resources (MR)

Credit: Material Ingredients

Material Ingredient Reporting (1 Point): A published, complete Health Product Declaration (HPD) is available for [Steel Retrofit Roof Hatch](#), with full disclosure of known hazards of all substances present at or above 0.1% (1000 ppm), in compliance with the Health Product Declaration Open Standard. Nystrom Steel Retrofit Roof Hatch can therefore contribute one whole product to the 20 different permanently installed products required for this credit.

Category: Indoor Environmental Quality (EQ)

Credit: Low-Emitting Materials (Up to 3 Points)

Nystrom Steel Retrofit Roof Hatch is constructed of at least 97% powder-coated, plated or anodized metals, which LEED considers inherently non-emitting sources of VOCs.
