

Standard Components

¼" X ⅝" Csk Flathead Machine
Screw PN 5620

⅜" X 2-¼" Anchor
PN 6514

Aluminum Floor Leaf Mount Extrusion
PN 18120

Aluminum Adjustable Spring Support
PN 17035

Prima-Lub
PN 2720

Aluminum Base Support
PN 18049

Aluminum Exposed Trim Surface
PN 17048

Spring Steel Leaf Spring
PN 17009

* ¼" X 2-¼" Anchor
PN 6581

*Spring Steel Leaf Spring
PN 17011

*Aluminum Wall Mount Leaf Extrusion
PN 18044

*Components required for corner condition installation.

Components shown below vary in size depending on
model of system

Moisture Barrier
PN 1181

Installation Procedure

Dimension Chart	
Model	"A"
EJ-FLC-100	7"
EJ-FLC-200	6"
EJ-FLC-400	4"

1

Prepare concrete block out for installation of expansion joint. Variations in block out dimensions must be corrected prior to beginning work.

2

Floor – Position Aluminum base support and Aluminum floor leaf mount extrusion on block out as shown. Mark anchor locations.
Note: Aluminum base support and Aluminum Floor leaf mount must have FULL BEARING on grout or slab.

(Corner Condition)

Dimension Chart	
Model	"B"
EJ-FLC-100W	7"
EJ-FLC-200W	6"
EJ-FLC-400W	4"

2A

Corner – Align top of wall leaf mount extrusion $\frac{1}{8}$ " above top of Aluminum base member as shown. Mark anchor locations.
Note: Aluminum base support and Aluminum Floor leaf mount must have FULL BEARING on grout or slab.

3

Drill holes for $\frac{3}{8}$ " x 2- $\frac{1}{4}$ " anchor to proper depth. Clean out holes.

4

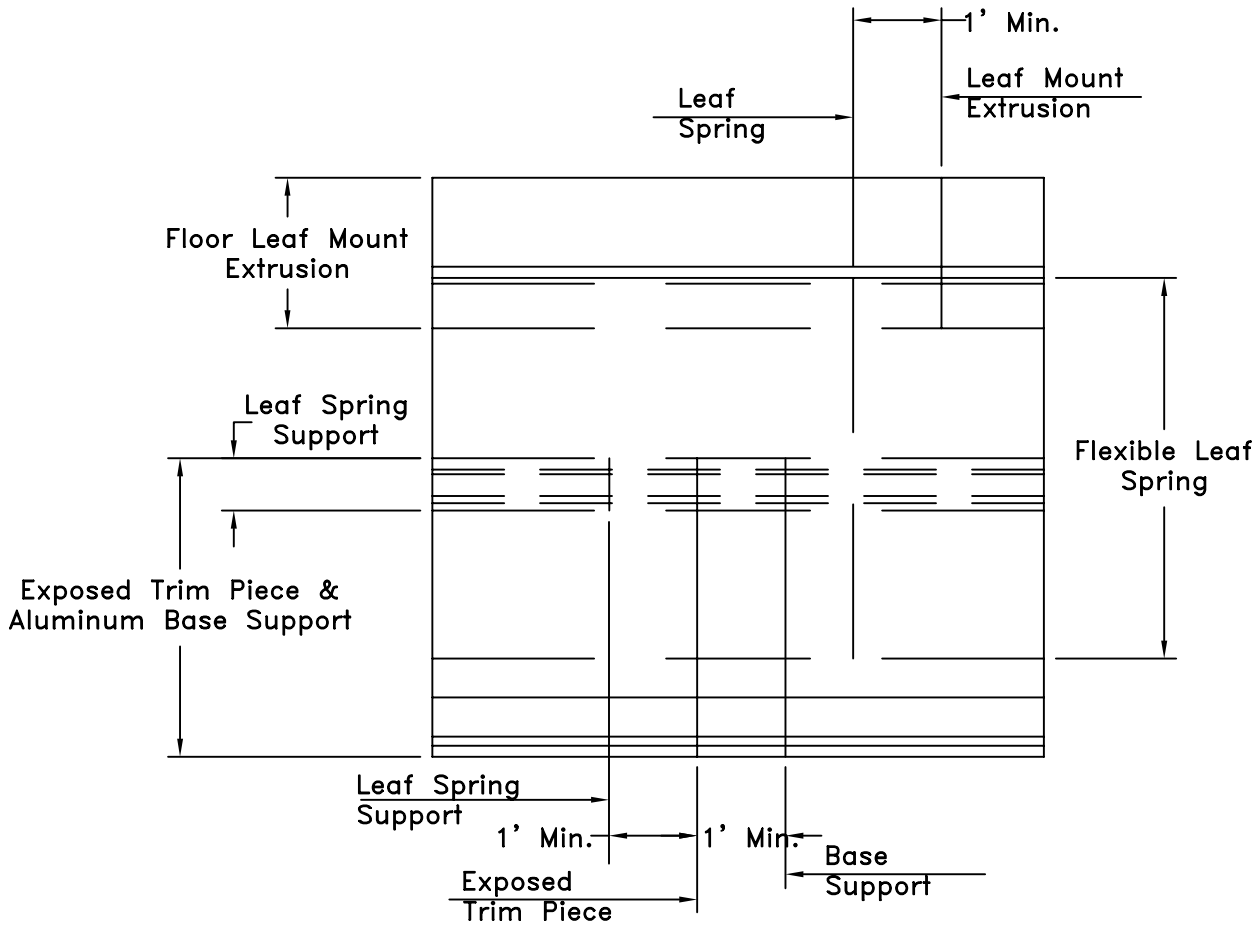

Floor - Slide spring support into proper slot of Aluminum base member. Adjust it according to the detail above depending on floor covering being used. Then utilizing manufacturers anchors , mount and secure Aluminum base Extrusion and Aluminum Floor Leaf Mount Extrusion to Concrete Slab.

Corner Condition

4A

Corner - Slide spring support into proper slot of Aluminum base member. Adjust it according to the detail above depending on floor covering being used. Then utilizing manufacturers anchors , mount and secure Aluminum base Extrusion and Aluminum Floor Leaf Mount Extrusion to Concrete Slab.

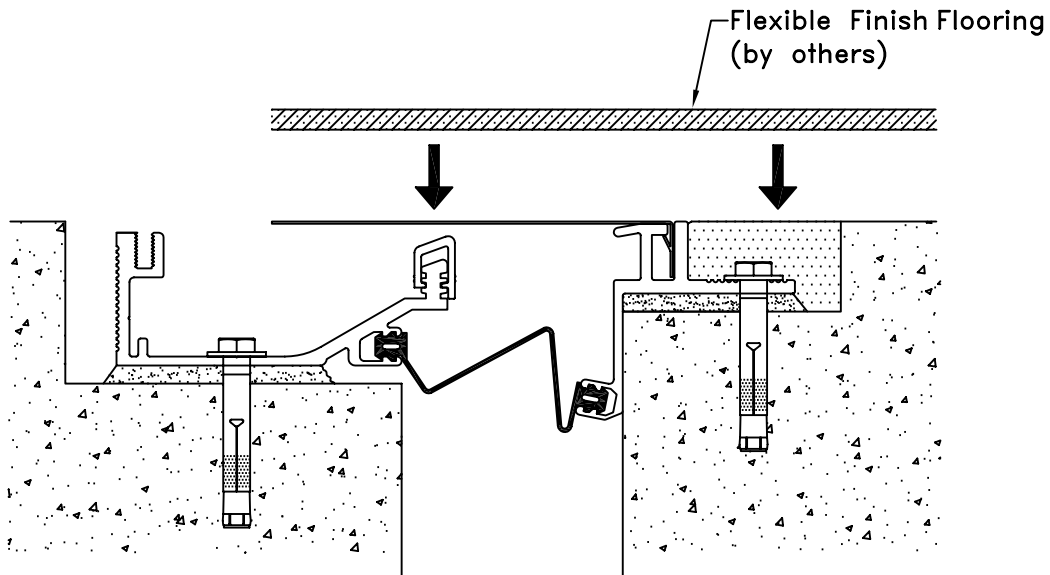

5

Stagger all splices in accordance with detail illustrated above to provide a stronger assembly and durable installation.

6

(Optional)
Brush apply prima-lub adhesive into extrusion cavity and install moisture barrier exercising care not to damage moisture barrier, ensure full engagement of locking lug.

10

Install flooring material on leaf spring side ONLY.

Note: Follow flooring manufacturers application procedures for proper installation of flooring material. Prepare leaf spring for carpet tape or adhesive as recommended by flooring manufacturer.

11

Slide trim piece into place, pushing down on the leaf spring as shown.

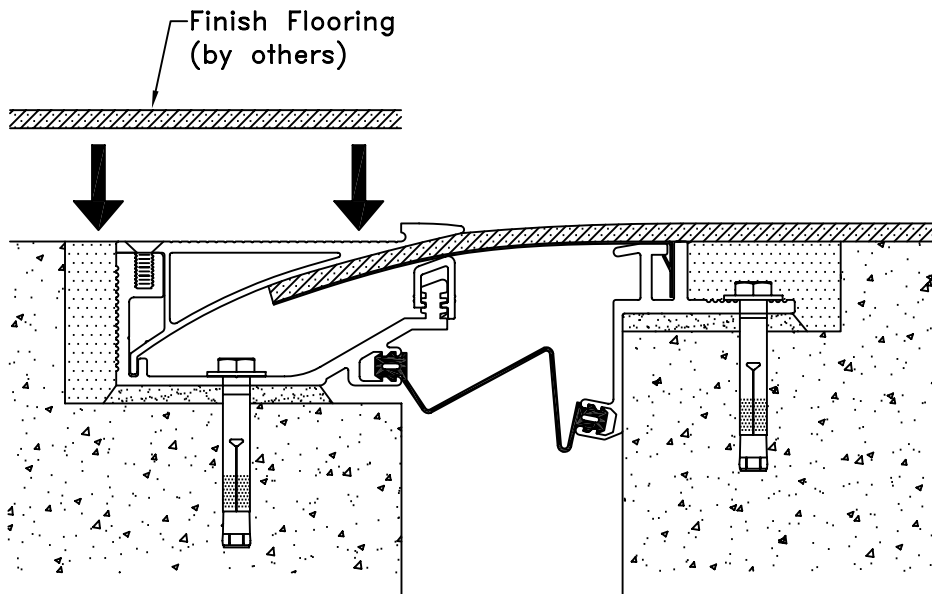

12

Maintain pressure on trim piece. Fasten trim piece to base extrusion utilizing $\frac{1}{4}$ " dia csk machine screw until flush with surface.

13

Install Grout into blockout on the base support side.
Note: Protect surfaces during placement of blockout infill.

14

Finish installing flooring material on trim piece, following flooring manufacturers application procedures for proper installation of flooring material.
