

Architectural Seismic System

RENOVATION APPLICATION (SFB)

The Renovation Seismic Expansion Joint System is designed for renovation building projects where an expansion joint is needed to tie new construction to existing construction. The system is bolted into the existing construction and a block out with back fill is necessary for the new construction.

Architectural Seismic System

CORROSION RESISTANT APPLICATION (SFX/W)

The Stainless Steel Architectural Seismic System is designed to cover expansion control openings in structural, high movement joints, when the specification calls for a stainless steel requirement.
