RE: Sustainability Statement

Nystrom certifies and provides the following information for use in achieving LEED v4 credit for the specification of Nystrom Stair Treads and Nosings.

Product EcoTread Stair Treads and Nosings

Model(s) STSB, STSF, STSB-N, STSF-N, STSB-N0.75, STTG, STTB, STRB with EcoTread Insert

Manufacturing Info

- Final Assembly Location: Brooklyn Park, MN
- Extraction point is not within 500 miles of manufacturing

LEED Credit Options:

Product Disclosure and Optimization – Material Ingredients

- Option 1. Material Ingredient Reporting (1 point) Use at least 20 different permanently installed products from at least five different manufacturers that use any of the following programs to demonstrate the chemical inventory of the product to at least 0.1% (1000 ppm). (10 different permanently installed products from at least three different manufacturers for CS and Warehouses & Distribution Centers)
 - Health Product Declaration. The end use product has a published and complete Health Product Declaration with full disclosure of known hazards in compliance with the Health Product Declaration open Standard.

If you require any further information, please do not hesitate to contact us at (800) 547-2635

HPD UNIQUE IDENTIFIER: 26983

CLASSIFICATION: 05 55 16 Metal Stair Nosings

PRODUCT DESCRIPTION: EcoTread Stair Treads and Nosings are extruded aluminum with EcoTread, slip resistant, replaceable, recycled rubber treads. Available in a wide variety of colors, they provide an alternative to the traditional abrasive filled stair nosing.

Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.2, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-2-standard

EXTRUDED ALUMINUM WITH RECYCLED RUBBER (ECOTREAD) STAIR TREAD AND NOSINGS

PRODUCT THRESHOLD: 1000 ppm

RESIDUALS AND IMPURITIES CONSIDERED:
Yes

RESIDUALS AND IMPURITIES NOTES: Residuals and Impurities were considered by following the suggestions of Emerging Best Practices. Approximately 80% of this product consists of metal alloys, for which Pharos CML may consider the various alloying elements as "Known or Potential Residuals". Therefore, these components have been included in the Substance Notes instead of as individual content entries. Components are listed by name, CASRN, percent by weight (as per supplier SDS), and relevant GreenScreen score. Residuals/Impurities for the recycled rubber treads are as per supplier HPD and as predicted by process chemistry (Pharos CML).

OTHER PRODUCT NOTES: Percent by weight of substances given as ranges to account for possible material differences between product options, as due to disclosure preference of suppliers.

SUBSTANCE NOTES: Recycled content confirmed by supplier as average 80%, including average 67% pre-consumer/post-industrial recycled scrap, and average 13% post-consumer recycled scrap. Documentation from supplier provides the following composition for alloying elements that may individually exceed the declared threshold: Magnesium [7439-95-4; LT-UNK]; Silicon [7440-21-3; LT-UNK]; Chromium [7440-47-3; LT-P1]; Copper [7440-50-8; LT-UNK]; Zinc [7440-66-6; LT-P1]; Manganese [7439-96-5; LT-P1]; Titanium [7440-32-6; LT-UNK]. Specific guidelines are being created to address known issues related to transparency and disclosure for several materials ("Special Conditions"), including those with Form-Specific Hazards such as Aluminum.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
